FOR IMMEDIATE RELEASE

TIMES TELECOM ANNOUNCES EXPANSION OF CANADIAN NETWORK TO 13 CITIES

Telecommunications provider launches in Montréal, Quebec City, Winnipeg, Whistler, Saskatoon, Regina, Ottawa and Halifax.

Vancouver, British Columbia –April 21st, 2005- Times Telecom Inc., a global provider of alternative long distance telephony services, announced today it is extending its Canadian Network to include Montreal, Quebec City, Winnipeg, Whistler, Kitchener, Ottawa, and Halifax, increasing its Canadian network roll-out to 13 cities.

Through ongoing expanding and building of the single owned state-of-the-art telephony infrastructure, Times Telecom can now provide low cost long distance service including unlimited calling plans to customers in all major cities such as Toronto, Vancouver, Edmonton, Calgary, Victoria, Montreal, Quebec City, Winnipeg, Ottawa, and Halifax.

"By creating additional network presence, we have further entrenched our position in the area of long distance services. Customers in all major cities throughout Canada can now benefit from our developed network," says Herman Ho, President of Times Telecom.

Among Times Telecom's core telephony services, the company has been providing nationwide long distance services in both Canada and Australia, delivering consumers huge cost savings in long distance services without having to switch providers along with on line conveniences such as e-billing, e-payment and many others. With the expansion of these Canadian cities, customers will now be able to subscribe to Times Telecom dial up long distance service,. The Company has offices in Canada and Australia as an alternative, highly competitive telecommunications provider to the global community, and revolutionizes the long distance industry with high quality state-of- the-art products.

Through continual investment and development of its privately owned telephone network, Times customers will appreciate a growing infrastructure which will provide quality service, on line conveniences, software and voice networking technologies, eliminating redundancy demands, and offering among the lowest cost telephony services provided.

"The convergence of voice and data networks has increased the demand for telephony and next-generation data networks. By taking advantage of Time's integrated global network, the company will be able to focus on the core business of providing affordable long distance services." Concluded Herman Ho, President of Times Telecom.

Times Telecom is a leading provider of long distance service in Canada and Australia under its well established brand "Times Telecom". Times Telecom provides long distance service and enables individuals to communicate with friends, business associates, and loved ones all over the world, while saving money. Times Telecom currently has more than 130,000+ corporate and individual customers. Times Telecoms international presence, involves IP application and enhanced network investments. Additional news and information about the company is available at www.timestelecom.ca and www.timestelecom.com.au.

This press release contains forward-looking statements relating to future operating information and their impact on future results. Actual results could differ materially from those projected in forward-looking statements as a result of risk factors such as market conditions, product life cycles, customer delays in purchasing products, competition, price sensitivity and the uncertain market acceptance of the Company's products by distributors, retailer and customers.
