TIMES TELECOM LAUNCHES PC TO PHONE VOIP SERVICE

Times Telecom launches innovative service under voipRocks, its new Voice over Internet Protocol (VoIP) division

Vancouver, BC - February 9, 2006– Times Telecom Inc. (Times) today announced the launch of its PC to Phone VoIP service in Canada. Branded as voipRocks PC2Phone, the service allows users to make international prepaid calls from their PC to landline or cellular phones with various "Pay as You Go" packages sold in denominations of USD$25-$50-$100-$200.

Times' first generation PC to Phone is a superior software-based phone application that allows anyone in the world the ability to make prepaid calls 24x7 on one's PCs as long as the user has access to the Internet, with a multimedia headset, a microphone and speakers, or a USB phone set.

The concept is simple states Terry Bahar, Vice President of Times Telecom, *"voipRocks PC2Phone can be compared to a prepaid calling card. You buy one of the offered packages; add the given Account Number and PIN unto your voipRocks dialer; and start making calls to any landline, cellular or satellite phones – anywhere in the world. Once you run out of minutes, you simply purchase more instead of being responsible for a long-term contract or recurring bills."*

No matter where the user resides, voipRocks revolutionary VoIP technology allows them to make international termination calls from anywhere, anytime, to over 300 countries/destinations worldwide without incurring the typical high costs that traditional long-distance providers usually charge. Times' worldwide direct-owned network also gives users the benefit of enjoying some of the most competitive rates among PC2Phone Service Providers.

Visit voipRocks PC2Phone on the Web at http://www.voiprocks.ca/softphone/ to download the software, buy PINs, locate your closest reseller, or to learn more on voipRocks PC2Phone.

Founded in 1996, Times Telecom is a leading Long Distance Service Provider that operates its own state-of-the-art proprietary network across 16 cities in Canada and 2 cities in Australia. As well, Times Telecom has a nationwide network that provides direct dial service.
